When Attacking Dribbling To perform a feint which would normally require a complex command, simply tilt the right stick in the direction you want to perform an evasive maneuver. *Applies only to console/PC versions While dribbling, this setting helps the player move in the right direction to avoid opponents who draw close. When the ball is about to go out of play near the touchline, this setting helps correct the dribbling speed and direction. Passing The target of passes will change to players who are open depending on the situation, such as if an opponent is blocking a passing lane or a teammate is making a run behind the defense. Depending on the situation, the pass type will automatically switch to a strongly hit or lofted ball, which would normally require quick decision-making and complex commands. Shooting The power and trajectory of shots are automatically determined without the need for precise shooting commands that require quick decision-making. When Defending The ball will automatically be cleared during dangerous situations in front of your own goal. This setting also helps defenders make a clearance in an appropriate direction. When using the Match-up command, the defender will automatically move in front of the opponent dribbling the ball. To adjust the defender's positioning, enter a direction. *During a Match-up, the defender crouches down and confronts the opponent in possession of the ball by taking precise steps while moving within an appropriate range, increasing the chances of successfully blocking a pass or shot. How to Change this Setting You can change the setting by following the steps below. Mobile version: [Extras] > [Game Settings] > [Play Settings] > [Smart Assist] Console/PC version: [Extras] > [Game Settings] > [Controller], select a controller to use, then choose [Detailed Settings] > [Smart Assist] An Authentic Team is a ready-to-use team that is available for you to play.Choose your favourite club or national team and enjoy matches against the AI in "Exhibition" mode, or play with your friends online via "Friend Match" mode. By signing players that are compatible with an Event's theme and adding them to your squad, you will have an advantage in the Event.
