you're human

This small script downloads a slideshare presentation and converts it to PDF. This code is made for fun, when i had a cup of coffee more then usual and icouldn't sleep. Using this code you may violate Slideshare terms andconditions. Is super easy:chmod +x slideshare-dl.sh/slideshare-dl.sh URLwhere URL is the link to the presentation. It requires wget, swfttools and imagemagick. Both download and conversion are done in parallel, speeding up the totalexecution time. The DPI used for the conversion is easily configurable, incase you need better definition or smaller files. Is not currently possible to extract (copy) text contents from the slides,since each slide is rendered to an image. An OCR option or a differentconversion may be included in the future.
